Quay Chair

Designed and Manufactured in Brooklyn, NY by Banner

DESCRIPTION

The Quay Chair features a curved seatback that intersects with strong vertical supports, a contrast that creates architectural angles.

A soft upholstered leather cushion balances with the innate density of the wood. Viewing the chair from different angles reveals new dimensions and details like traditional joinery in the legs—the piece seems to move as you look at it.

Shown in oxidized Walnut with black leather, natural Walnut with bronze leather, bleached Ash with dark brown leather
