Deca Planter | Solar Flare Grey

Designed and Manufactured in Seattle, WA by Force/Collide

DESCRIPTION

Introducing Force/Collide's signature planter, now in nine colors and four sizes. Using a seamless brake-forming technique, one sheet of steel is wrapped into a unique geometric pattern that's triangular at the top and hexagonal at the base. The basin sits atop three fabricated legs that elongate its lines, perching it off the ground into a stand alone piece of furniture.

For ultimate versatility, the Deca Planter is fabricated with optional drainage. Each one includes a 1/2" hole in the bottom, along with a sheet metal plug that seals to stop water.

The Deca Planter comes in a weather-proof, powder coated finish that's great for indoor or outdoor use. Colors with a "solar flare" topcoat have tones that organically change from dark to light with a glossy sheen.
