

TABLES - DESKS

104 Desk

Designed and Manufactured in Brooklyn, NY by Wintercheck Factory

DESCRIPTION

The 104 Desk is comprised of an industrial fiberglass top and steel legs that are powder coated, have adjustable feet and are removable. The desktop is equipped with a grommet for cord access and the back rail is slightly curved to provide a resting spot for pens.

Our manufacturer fabricates the 104 Desk using a hand lay-up process. This is the oldest and simplest method for making fiberglass designs with an open mold. This process is used for lower volumes and is more labor intensive but incredibly strong; it's frequently used to make boat hulls. Layers of fiberglass are piled onto a custom mold and then a resin is poured on top, a process which must be monitored so that entrapped air can be squeezed out as the resin begins to cure and harden.

SPECIFICATIONS

Dimensions

L 40" x W 20" x H 22-31"

Product Materials

Fiberglass and Steel

LEAD TIME

6 weeks
