

TABLES - DINING

Brindle Table

Designed and Manufactured in Brooklyn, NY by CBR Studio

DESCRIPTION

The Brindle Table provides a striking balance between density and lightness. The weight of the marble floats atop a lean structure of walnut. The marble's honed surface is rich in tone and pattern, and offers a beautiful support for special occasions and everyday meals. The table's design is similar to a traditional frame but with the details of construction found on the exterior rather than concealed underneath.
