Meridian Modular Credenza Horizontal

Designed and Manufactured in Seattle, WA by Force/Collide

DESCRIPTION

By far the most versatile construction in Force/Collide's portfolio, the Meridian Modular Credenza is an all steel construction consisting of double-sided paneling and all-hidden fasteners. It provides total flexibility; the credenza breaks apart into three individual cabinetry components that can be reconfigured in numerous ways, or isolated and used independently. Hyper-dimensional in any arrangement, there is virtually no top or bottom to any one of the three components, lending them to function seamlessly in every 90 degree rotation.

HORIZONTAL POSITION

Spanning almost 8 feet across, and hitting 3 feet high, this is the perfect position for use as a traditional credenza, a centerpiece for a living room, a sideboard for the dining room, or a bookshelf for the library. Each of the three units bolt together from hidden access points inside the cabinet in order to lock together. Two square cabinets consist of open shelving that are mirrored symmetrically for maximized function aesthetic balance in either their horizontal or vertical positions. Divisions are carefully designed to be balanced no matter how the units correspond to one another; the variety of cavity sizes gives flexibility functionally and aesthetically, whether it be heirlooms, board games, books, liquor, glassware, or linens that are stored.

SPECIFICATIONS

Materials

Blackened hot rolled steel

Dimensions

92.75" x 16.25" x 38"

LEAD TIME

24-25 weeks
