

#### STORAGE - SHELVES

## Meridian Modular Credenza Vertical

Designed and Manufactured in Seattle, WA by Force/Collide

#### DESCRIPTION

By far the most versatile construction in Force/Collide's portfolio, the Meridian Modular Credenza is an all steel construction consisting of double-sided paneling and all-hidden fasteners. It provides total flexibility; the credenza breaks apart into three individual cabinetry components that can be reconfigured in numerous ways, or isolated and used independently. Hyper-dimensional in any arrangement, there is virtually no top or bottom to any one of the three components, lending them to function seamlessly in every 90 degree rotation.

#### VERTICAL POSITION

The vertical position is another way to attain maximal storage with a smaller footprint. With the option to reverse the door and have it held open or to remove it altogether, this arrangement creates a dramatic effect and offers some extended clearances for objects that may be taller than usual. These clearances are a stand-in for what the top surface would provide when in the horizontal position.

#### SPECIFICATIONS

##### Materials

Blackened hot rolled steel

##### Dimensions

92.75" x 16.25" x 38"

## LEAD TIME

24-25 weeks
