## Compressed Hardwood Wall Paneling

Designed and Manufactured in Brooklyn, NY by May Furniture

#### DESCRIPTION

May Furniture custom wall paneling is made with May Furniture's unique signature material Compressed Hardwood. The material is comprised of blends of wood from fast-growth trees such as birch, pine, cedar, poplar, and maple. By using only fast-growth trees, this takes the strain off of slow growth forests and supports new forest growth. Blended wood off-cuts are positioned and arranged using unique methods to create the final material. The end result is a beautifully organic stone-like surface, honed to a smooth matte finish, embodying the warmth and essence of wood.
