

STORAGE - CREDENZAS

Meridian Modular Credenza Two Up

Designed and Manufactured in Seattle, WA by Force/Collide

DESCRIPTION

By far the most versatile construction in Force/Collide's portfolio, the Meridian Modular Credenza is an all steel construction consisting of double-sided paneling and all-hidden fasteners. It provides total flexibility; the credenza breaks apart into three individual cabinetry components that can be reconfigured in numerous ways, or isolated and used independently. Hyper-dimensional in any arrangement, there is virtually no top or bottom to any one of the three components, lending them to function seamlessly in every 90 degree rotation.

INDEPENDENT POSITIONS

The beauty of this design is that each of the three units is fully functional and complete in their stand-alone forms. Not only can they be broken down to independent pieces, but each piece is capable of rotating 90 degrees to accommodate alternative storage solutions.

SPECIFICATIONS

Materials

Blackened hot rolled steel

Dimensions

92.75" x 16.25" x 38"

LEAD TIME

15-16 weeks
