

MIRRORS - FLOOR

Tramp Mirror

Designed and Manufactured in Burlington, VT by Brüt Design

DESCRIPTION

The tramp mirror was inspired by the intricate and offbeat woodcarvings of 19th century American tramps. The border is made up of more than 600 individually shaped pieces of brass, while the structure displays vibrant blue straw marquetry that brings life and intrigue into any interior space. Brüt Design is one of only a handful of studios around the world that has mastered the technique of Straw Marquetry. The tramp mirror is also available with a hammered bronze border.

Shown in Brass
