

#### STORAGE - CREDENZAS

## Meridian Modular Credenza Corner

Designed and Manufactured in Seattle, WA by Force/Collide

#### DESCRIPTION

By far the most versatile construction in Force/Collide's portfolio, the Meridian Modular Credenza is an all steel construction consisting of double-sided paneling and all-hidden fasteners. It provides total flexibility; the credenza breaks apart into three individual cabinetry components that can be reconfigured in numerous ways, or isolated and used independently. Hyper-dimensional in any arrangement, there is virtually no top or bottom to any one of the three components, lending them to function seamlessly in every 90 degree rotation.

#### CORNER POSITION

The corner position is the crux of flexibility for the Meridian Modular Credenza. Designed to give maximal storage in a minimal amount of space, one side of the right-hand unit has been left open to create an access point to the cabinet. The removable door being a key feature for this configuration, all shelves are fully accessible and surface counter area is equivalent to the horizontal configuration.

#### SPECIFICATIONS

##### Materials

Blackened hot rolled steel

##### Dimensions

92.75" x 16.25" x 38"

**LEAD TIME**

24-25 weeks
