

LIGHTING - TABLE

Brick Lamp Walnut

Designed and Manufactured in Long Island City, NY by Hyfen

DESCRIPTION

A minimal and portable LED lamp, is activated when raised(on) or laid flat(off).

The objective is to capture the moment of light - being concealed and revealed. This unique lighting design would turn a quotidian routine into an enriching experience, providing an unexpected, fun quality to a daily object.

We accomplished this by making a simplified and functional lamp, instead of a switch, light is activated when raised(on) and deactivated when laid flat(off). By creating the side facets, a natural handle is made and also directs the light when the brick sits on it's sides.

This wood version is made from an authentic single piece of walnut wood lumber, coated with an all natural eco-friendly clear stain to give it an elegant finish.

SPECIFICATIONS

Materials

Walnut

Dimensions

7.5" L x 5.3" W x 1.65" H

Lamping

Battery : 5 hours usage

Light source : 3W warm white LED

Input : 5V DC connector & USB port
