

LIGHTING - TABLE

Brick Lamp Concrete

Designed and Manufactured in Long Island City, NY by Hyfen

DESCRIPTION

A minimal and portable LED lamp, is activated when raised(on) or laid flat(off). The objective is to capture the moment of light - being concealed and revealed. This unique lighting design would turn a quotidian routine into an enriching experience, providing an unexpected, fun quality to a daily object.

We accomplished this by making a simplified and functional lamp, instead of a switch, light is activated when raised(on) and deactivated when laid flat(off). By creating the side facets, a natural handle is made and also directs the light when the brick sits on it's sides. The concrete version Brick Lamp is made from a special mix of cement and fine grain sands. With added pigment to enrich the color, the concrete housing is cast in a high quality rubber mold to create a super fine and smooth finish.

SPECIFICATIONS

Materials

Concrete

Dimensions

7.5" L x 5.3" W x 1.65" H

Lamping

Battery : 5 hours usage

Light source : 3W warm white LED

Input : 5V DC connector & USB port

LEAD TIME

3-5 days
