

LIGHTING - WALL

Arc Light

Designed and Manufactured in Brooklyn, NY by Thislexik

DESCRIPTION

Made primarily from solid walnut wood, the Arc Wall Light is hand cut for each LED to fit snugly in the meticulously carved grooves. The final product boasts an interactive design that allows users to adjust the placement and brightness of the LED bulbs. The hidden technology generates an electric field of energy that pushes electrons through the light bulb wirelessly. Because the lights are not directly connected to an energy outlet, they only illuminate when in close proximity to the Arc Light, transforming a stationary wall fixture into a functional (and fun) piece of art.

The Arc Light was awarded the 2015 Best of Products Award in Visionaries by the Architect's Newspaper.

SPECIFICATIONS

Dimensions

48" L x 13" W x 23" H

Materials

Walnut, LED

Returns accepted within 14 days. Custom orders are final sale.

LEAD TIME

8-10 weeks
