

LIGHTING - WALL

Lina 03-Light Triangle Flushmount

Designed and Manufactured in Brooklyn, NY by Rosie Li

DESCRIPTION

Inspired by 1960s Italian lighting, Lina is an all-brass lighting system designed to create airy geometric forms. Each sphere hub seamlessly joins with minimal hardware to form sculptural takes of the modern chandelier. The series' simple modular construction allows the studio to explore a variety of Lina shapes and sizes. Available in polished brass, brushed brass, polished nickel, and oil-rubbed bronze.
